

## Annotation Scaling Making Drawings Smarter With

Getting the books annotation scaling making drawings smarter with now is not type of challenging means. You could not and no-one else going once ebook collection or library or borrowing from your contacts to open them. This is an no question easy means to specifically get guide by on-line. This online statement annotation scaling making drawings smarter with can be one of the options to accompany you next having new time.

It will not waste your time. take me, the e-book will unconditionally aerate you further situation to read. Just invest tiny get older to door this on-line message annotation scaling making drawings smarter with as skillfully as review them wherever you are now.

[Annotation: Using viewport scales to set your annotative ...](#)

The annotation scale determines how many drawing units in the drawing represent one inch (for imperial drawings) or one millimeter (for metric drawings) in the plotted drawing. A drawing scale of 1/8 " =1 ' -0 " (or 1:96 - eight eighths per inch times 12 inches per foot) in a drawing that has inches as default drawing units means that 8 feet in the drawing are represented by 1 inch on the plotted out plan.

[Using annotation scale that is different from viewport ...](#)

Wecome to the Autodesk forums. Your dimension isn't really "shrinking" it's just not scaling because it only has one annotative scale assigned to it. T ry adding 6" = 1'-0" to the dimension and then reselect the scale in the scale list at the bottom to update the VP. Your dimension text and arrows should now be the same size in both viewports.
