Advanced Accounting delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

Building upon previous editions of Advanced Accounting, author Debra C. Jeter continues to deliver a balanced and detailed approach to the conceptual and technical aspects of advanced accounting. This new and enhanced edition features more in-depth information about international accounting, the upcoming globalization of accounting standards, changes with FASB's, and the latest developments and differences between U.S. GAAP and IFRS. As always, the text also includes comprehensive coverage of all three methods of consolidated financial reporting (cost, partial equity, complete equity).

Intended for a senior level course in advanced accounting taught at many four-year schools, the book's primary objective is to provide a comprehensive treatment of selected topics in a clear and understandable manner. The third edition reflects current issues in advanced accounting, integrates all three alternative recording methods (cost, partial equity, complete equity) for teaching consolidation concepts using worksheet icons and labels to distinguish among the three methods and new, enhanced student pedagogy.

Discusses the underlying theory and application of business combinations, consolidated financial statements, foreign currency transactions, partnerships and accounting for non-business organizations. Adapted exercises, questions and problems from the CPA exam are included.
