### **Electrics are the Future for Light Commercial Vehicles**

On December 17, 2018, representatives of the European Commission, the European Parliament, and the European Council agreed on a compromise for the European Union (EU) regulation setting binding carbon dioxide (CO 2) emission targets for new passenger cars and light-commercial vehicles for 2025 and 2030. The agreed-upon targets aim to reduce the average CO 2 emissions from new cars by 15% in 2025 and by 37.5% in 2030, both relative to a 2021 baseline.

### **CO2 emission standards for passenger cars and light ...**

The light commercial vehicle market up to 3.5 tonnes grew by 13.3% in October as van production across Europe is 'almost back to normal'. Demand was strong across all segments except pick-ups where registrations are generally driven by retail customers in the leisure market and the agriculture sector, which is currently facing uncertainty as the UK prepares to leave the EU.
