Improving documentation is no easy task CDI professionals have never had one easy-to-read, inclusive reference to help them implement a CDI program, understand the fundamentals of ICD-9-CM coding, query physicians, and encourage interdepartmental communication. In theory, physicians should document their entire thought process, including ruling conditions in and out. But it's not that simple, and in light of MS-DRGs, it requires significant physician education and retraining. You need a blueprint for success.. Your blueprint has arrived! At last, here is a guide for CDI specialists. The Clinical Documentation Improvement Specialist's Handbook is your essential partner for creating a CDI program, staffing your program, querying physicians, and understanding how documentation affects code selection and data quality As a CDI specialist you need answers now In light of Medicare Severity DRGs (MS-DRG), detailed documentation and accurate capture of complications and comorbidities (CCs) has made the CDI specialist's role more important and more demanding than ever. This handbook will enhance your ability to gather the right information the first time--and every time Author Colleen Garry, RN, BS, has compiled case studies that document best practices and reference several different CDI models so that you can select the one that's right for your hospital's CDI success. In addition, you'll be privy to an executive summary of HCPro's exclusive CDI survey that solicited more than 800 responses. Learn how other hospitals are handling CDI and

A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care - and to more effectively

meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged by concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality, Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and slotting of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submission of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research . A companion website hosts related resources. Key features 2012-2014 edition arranged by diagnostic concepts Core references and level of evidence for each diagnosis New chapters on appropriate use of nursing diagnoses in clinical practice, education, administration and electronic health record 16 new diagnoses 11 revised diagnoses Aimed at students, educators, clinicians, nurse administrators and informaticians Companion website available, including a video on assessment, clinical reasoning and diagnosis
