Contextual teaching and learning involves making learning meaningful to students by connecting to the real world. It draws upon students' diverse skills, interests, experiences, and cultures and integrates these into what and how students learn and how they are assessed. In other words, contextual teaching situates learning and learning

### CONTEXTUAL TEACHING AND LEARNING: WHAT IS IT

The contextual approach recognizes that learning is a complex and multifaceted process that goes far beyond drill-oriented, stimulus-and-response methodologies. According to contextual learning theory, learning occurs only when students process new information or knowledge in such a way that it makes sense to them in their own frames of reference (their own inner worlds of memory, experience, and response).

Model pembelajaran Contextual Teaching and Learning (CTL), menawarkan bentuk pembelajaran yang membantu guru mengaitkan antara materi yang diajarkan dengan situasi dunia nyata siswa. CTL merupakan suatu pendekatan pembelajaran yang menekankan pada proses keterlibatan siswa untuk menemukan materi yang dipelajarinya dan menghubungkan serta menerapkannya dalam kehidupan mereka.

Contextual Teaching and Learning is an examination of a holistic approach to education. The book provides its readers with a comprehensive definition of Contextual Teaching and Learning (CTL), discussing its origins and philosophy, its basis in psychology, neuroscience, modern physics and biology. While attitudes toward education are often shaped by popular views in science, author Elaine B Johnson outlines the importance of integrating modern scientific discoveries into current education practices. Contextual Teaching and Learning: What It Is and Why It's Here to Stay stresses interdependence, differentiation, and self-organization as the principals that form CTL, as opposed to the dualism between thought and action that plagues traditional views on education. Elaine B Johnson illustrates the relationship between brain functions, memory retention, and teaching methods, and the significance of incorporating real life examples in lesson plans.

Contextual teaching and learning (CTL) is a system for teaching that is grounded in brain research. Brain research indicates that we learn best when we see meaning in new tasks and material, and we discover meaning when we are able to connect new information with our existing knowledge and experiences. Students learn best, according to neuroscience, when they can connect the content of academic lessons with the context of their own daily lives. Johnson discusses the elements of the brain-compatible contextual teaching and learning system: making meaningful connections; investing school work with significance; self-regulated learning; collaboration; critical and creating thinking; nurturing the individual; reaching high standards; and using authentic assessment. Drawing on the practices of teachers in kindergarten through university, Johnson provides numerous examples of how to use each part of the CTL system.

Elaine Johnson demonstrates how implementing contextual teaching and learning can change students' lives and help them achieve academic excellence.

Contextual teaching and learning (CTL) is a concept that helps teachers relate school learning to real-world situations. CTL motivates learners to take charge of their own learning and to make connections between knowledge and its application. This book is a guide to reforming teaching and teacher education because it gives teachers and teacher educators an opportunity to see how contextual teaching and learning can change classrooms and teacher education programs

## File Type PDF Contextual Teaching And Learning What It Is And Why Its Here To Stay

Contextual teaching is emerging as an important concept in education reform efforts. This field study attempts to clarify the concept of contextual teaching by defining and identifying characteristics found in the research literature, experienced teacher observations and practices, and students' views of contextual teaching. The foundation for this field study was developed out of a larger project funded by the U.S. Department of Education known as the Oregon State University Contextual Learning Institute and Consortium. The purpose of this project was to conduct research in contextual teaching and learning in five Portland, Oregon, high schools involving 32 teachers and 350 students. This field study involved three, of the five high schools (7 teachers and 11 students) and five experienced teacher/consultants. Those involved in this study define contextual teaching in varying ways, but there was unanimous agreement that the basis for contextual teaching is making the connections between what a student is trying to learn and some aspect of a real world experience. A consensus of teachers participating in this study define contextual teaching as school experiences that provide meaning, relevance, real life experiences, and connections. The key characteristics of contextual teaching as identified by this study included: 1) Students learn more by combining knowing and doing wherever possible. 2) Students see that learning expectations have some connection to everyday life. 3) Students draw connections between different subject-matter disciplines bringing together content and context of application. 4) Students and teachers use teamwork and collaboration to solve real-life problems. 5) Emphasizes that active and involved students learn more, while requiring creative ways of dealing with school structure and calendar. 6) Contextual pedagogy stresses teaching knowledge and skills differently, not teaching different knowledge and skills. 7) The role of the teacher changes from expert to that of coach. Based upon findings of this field study, contextual teaching can be defined as an educational and instructional strategy focusing on enabling students to see meaning and relevance in their education. Knowledge and application of knowledge are deliberately tied together in the teaching act. Contextual teaching aims at helping all students make connections between subject-matter content and context of application.

Buku ini sangat menarik dan cocok bagi para pendidik yang ingin mempelajari dan menerapkan model pembelajaran CTL di kelasnya. Penjelasan tentang konsep atau model pembelajaran CTL disajikan secara ringkas tapi mencakup semuanya mulai dari pengertian dan konsep, komponen-komponen, karakteristik pembelajaran hingga perbandingan pendekatan CTL dengan model konvensional. Bahkan di bagian akhir buku ini juga diberikan contoh konkrit bagaimana menerapkan model pembelajaran CTL pada mata pelajaran Fisika di sekolah menengah tingkat atas. Hal ini membuat buku ini semakin membantu para guru (lebih khusus lagi guru Fisika di SMA) yang ingin mempelajari dan menerapkan model pembelajaran CTL.

This fastback gives teachers and teacher educators an opportunity to see how contextual teaching and learning (CTL) can change classrooms and teacher education programs. The author uses fictional cases to describe how to implement CTL strategies and summarizes the implications for schools and teacher education programs. Understanding what needs to be done and how to go about it are keys to successful change.
