Digital Television deals with all present-day

# Get Free Electronic Program Guide

TV transmission methods, i.e. MPEG, DVB, ATSC and ISDB-T. The DVD Video is also discussed to some extent. The discussion is focussed on dealing with these subjects in as practical a way as possible. Although mathematical formulations are used, they are in most cases only utilized to supplement the text. The book also contains chapters

# Get Free Electronic Program Guide

dealing with basic concepts such as digital modulation or transformations into the frequency domain. A major emphasis is placed on the measuring techniques used on these various digital TV signals. Practical examples and hints concerning measurement are provided. The book starts with the analog TV baseband signal and

# Get Free Electronic Program Guide

then continues with the MPEG-2 data stream, digital video, digital audio and the compression methods. After an excursion into the digital modulation methods, all the mentioned transmission methods are discussed in detail. Interspersed between these are found the chapters on the relevant measuring technique.

[ANGL È S] Nowadays, televisions offer a large set of useful tools and possibilities. Many of them, like the internet connection, offer a wide number of options. This project is intended to perfect some of them, specifically the Electronic Programming Guide (EPG). This tool presents the scheduled

# Get Free Electronic Program Guide

emissions of programs (events) for every channel (service) in the television. EPG data is provided by broadcasters through the antenna signal together with the multimedia contents of each channel. This fact leads to two main problems. First, the quality and quantity of the EPG information is very limited due to the lack of bandwidth. As a

## Get Free Electronic Program Guide

result, an event extracted from the antenna signal contains only data referring to its schedule (start and end time), a title and a brief description. The second issue arises when, in order to obtain the complete EPG, it is necessary to tune every channel of the television. Otherwise, the EPG will be displayed almost empty. At the same time,

## Get Free Electronic Program Guide

there are specialized internet servers in charge of improving the contents of the television guide. Some of the enhancements include structuring and extending the title and descriptions of events, classifying the event by its category or adding a snapshot of the program. However, these types of events are less accurate in their schedule, since this

# Get Free Electronic Program Guide

information is updated along the time by broadcasters and re ected in the antenna signal. Taking advantage of the internet connectivity of television, this project has created an Smart Electronic Programming Guide (SmartEPG) combining the information of di erent sources: antenna signal and internet server. In order to

# Get Free Electronic Program Guide

actually extend the contents, the project has considered the differences among antenna and internet events, identified the similarities and combined the contents. As a result, this document presents the development of the main components of the project as well as an overview of the resulting guide presented using a new graphical user interface.
