In the year 12,020 G.E., Hari Seldon arrives in the domed city of Trantor and begins to develop his theory of psychohistory, which predicts the rise of a power greater than the Empire. Reissue.

This book presents the ontological and logical foundation of a new form of thinking, the beginning of an "absolute phenomenology." It does so in the context of the history of thought in Europe and America. It explores the ramifications of a categorically new logic. Thinkers dealt with include Plato, Galileo, Hegel, Kierkegaard, Marx, Nietzsche, Husserl, Heidegger, Peirce, James, Dewey, Derrida, McDermott, and Altizer.

When the First Foundation was conquered by a force Seldon had not foreseen - the overwhelming power of a single individual, a mutant called the Mule - the second Foundation was forced to reveal its existence and, infinitely worse, a portion of its power. One man understood the shifting patterns of the inhabited cosmos. This was Hari Seldon, the last great scientist of the First Empire. The mathematics of psychohistory enabled Seldon to predict the collapse of the Empire and the onset of an era of chaos and war. To restore civilization in the shortest possible time, Seldon set up two Foundations. The First was established on Terminus in the full daylight of publicity. But the Second, "at the other end of the galaxy", took shape behind a veil of total silence. Because the Second Foundation guards the laws of psychohistory, which are valid only so long as they remain secret. So far the second Foundation's location, its most closely guarded secret of all, has been kept hidden. The Mule and the remnants of the First Foundation will do anything to discover it. This is the story of the Second Foundation.

The first novel in Isaac Asimov's classic science-fiction masterpiece, the Foundation series THE EPIC SAGA THAT INSPIRED THE APPLE TV+ SERIES FOUNDATION, NOW STREAMING • Nominated as one of America's best-loved novels by PBS's The Great American Read For twelve thousand years the Galactic Empire has ruled supreme. Now it is dying. But only Hari Seldon, creator of the revolutionary science of psychohistory, can see into the future—to a dark age of ignorance, barbarism, and warfare that will last thirty thousand years. To preserve knowledge and save humankind, Seldon gathers the best minds in the Empire—both scientists and scholars—and brings them to a bleak planet at the edge of the galaxy to serve as a beacon of hope for future generations. He calls his sanctuary the Foundation. The Foundation novels of Isaac Asimov are among the most influential in the history of science fiction, celebrated for their unique blend of breathtaking action, daring ideas, and extensive worldbuilding. In Foundation, Asimov has written a timely and timeless novel of the best—and worst—that lies in humanity, and the power of even a few courageous souls to shine a light in a universe of darkness.

Crassostrea virginica, the eastern oyster. These humble bivalves are the living bones of the Chesapeake and the ecological and historical lifeblood of the region. When colonists first sailed these impossibly abundant shores, they described massive shoals of foot-long oysters. But the bottomless appetite of the Gilded Age and great fleets of skipjacks took their toll. Disease, environmental pressures and overconsumption decimated the population by the end of the twentieth century. While Virginia turned to bottom-leasing, passionate debate continues in Maryland among scientists and oystermen whether aquaculture or wild harvesting is the better way forward. Today, boutique oyster farming in the Bay is sustainably meeting the culinary demand of a new generation of connoisseurs. With careful research and interviews with experts, author Kate Livie presents this dynamic story and a glimpse of what the future may hold.

This book, updated and improved, introduces the mathematics that support advanced computer programming and the analysis of algorithms. The book's primary aim is to provide a solid and relevant base of mathematical skills. It is an indispensable text and reference for computer scientists and serious programmers in virtually every discipline.

A sense of fatigue dogs the fitness world. Many of the new programs that are tagged as groundbreaking are actually recycled ideas.

Foundation offers something completely different for novices and athletes alike: a simple program with powerful and proven results that will remedy bad posture, alleviate back pain, and help readers break through fitness challenges and plateaus. Dr. Eric Goodman, a brilliant and dynamic young chiropractor, teams up with Peter Park, one of the top trainers in the United States, to radically redefine the core--shifting the focus from the front of the body to the back. Their groundbreaking approach works to strengthen the lower back and the full posterior chain and correct poor movement patterns by addressing mechanical imbalances and weaknesses. Foundation training involves simple movement patterns and is equipment free, creating maximum power, flexibility, and endurance. Word-of-mouth enthusiasm has inspired both Hollywood luminaries and world-class athletes to make Foundation training the core of their fitness programs. Eric and Peter's client list has grown exponentially to include Lance Armstrong, NBA star Derek Fisher, world-champion surfer Kelly Slater, and actor Matthew McConaughey.

Sexuality and faith formation for a lifetime"

More than a thousand years ago on the north coast of Peru, Indigenous Moche artists created a large and significant corpus of sexually explicit ceramic works of art. They depicted a diversity of sex organs and sex acts, and an array of solitary and interconnected human and nonhuman bodies. To the modern eye, these Moche "sex pots," as Mary Weismantel calls them, are lively and provocative but also enigmatic creations whose import to their original owners seems impossible to grasp. In *Playing with Things*, Weismantel shows that there is much to be learned from these ancient artifacts, not merely as inert objects from a long-dead past but as vibrant Indigenous things, alive in their own inhuman temporality. From a new materialist perspective, she fills the gaps left by other analyses of the sex pots in pre-Columbian studies, where sexuality remains marginalized, and in sexuality studies, where non-Western art is largely absent. Taking a decolonial approach toward an archaeology of sexuality and breaking with long-dominant iconographic traditions, this book explores how the pots "play jokes," "make babies," "give power," and "hold water," considering the sex pots as actual ceramic bodies that interact with fleshly bodies, now and in the ancient past. A beautifully written study that will be welcomed by students as well as specialists, *Playing with Things* is a model for archaeological and art historical engagement with the liberating power of queer theory and Indigenous studies.

Private foundations have been the dynamo of social change since their invention at the beginning of the last century. Yet just over 10 percent of the public knows they even exist; and for those who are aware of them, as well as even those who seek grants from them, their internal workings remain a complete mystery. Joel Fleishman knows the sector like few others, and in this groundbreaking book he explains both the history of foundations—with their fledgling beginnings in the era of the robber barons seeking social respectability—through to the present day. This book shows how, why foundations matters, and how the future of foundations can provide a vital spur to the engine of the American, and the world's, economy—if they are properly established and run.
