Recommended Cleanroom Clothing Standards Non Aseptic

If you are a manufacturer of non-sterile medicinal products, you should define your own clean room / area standards using national and international standards. Usually manufacturers will define an airborne particulate concentration standard class such as ISO 14644-1 ISO 8 (at rest), outline gowning and a pressure cascade regime, defining a 'clean corridor' design or a 'dirty corridor' ...

Basic clean room design requirements and considerations

A cleanroom classified as ISO Class 5 or ISO Class 6 (or cleaner) requires cleanroom coveralls, along with hoods, gloves, and booties (shoe covers). For sterile processing, additional precaution is needed to assure that no sterile surfaces contact non-sterile surfaces during gowning, processing, or cleaning.

Cleanroom Cleaning and Gowning Protocol Guide - ISO 14644

The International Standards Organisation uses the standard ISO 14644 to outline the approach for the design, classification and operation of cleanrooms. ISO 14644 has a ranking system for cleanrooms running from ISO 1 to 9.

What Are The Differences in ISO Cleanroom Classifications ...

While USP 797 calls for non-shedding or non-linting apparel to be worn while working in clean areas, the term 'non-shedding' is very loosely used by cleanroom apparel manufacturers. Among the most popular materials marketed as lint-free or non-shedding are Tyvek, SMS, microporous-coated, and polypropylene.
