Complete with checklists and forms, this step-by-step guide tells everything the facilities management professional needs to know about conducting lighting surveys and audits in a commercial or industrial facility. Lighting audits are required when companies undertake lighting retrofits and related projects in order to improve their lighting systems. The best way to ensure maximum performance of the new systems, maximize return on investment, and prove energy savings (in order to qualify for financial assistance or meet government targets) is to start with a

detailed in this straightforward, non-technical reference. Ideal for building owners and managers, facility managers, or anyone concerned with reducing lighting costs, this book cuts through the maze of technical details to provide clear, readily applicable lighting answers. The author has placed special emphasis on the importance of effective maintenance, and the benefits of a well planned and executed lighting management program. In addition, the environmental aspects of lighting management are thoroughly addressed.
