The psychodynamic approach to counselling aims to help clients to develop their self-awareness by exploring what is happening in their process at an unconscious level. Relevant psychoanalytic concepts such as defence mechanisms ; the Jungian concept of shadow ; psychosexual stages; and ego, superego and id are likely to form a part of how a psychodynamic therapist makes sense of the material the client brings.

~~The Psychodynamic Counselling Primer Counselling Primers~~  
Psychodynamic therapy (also known as psychodynamic counselling) is a therapeutic approach that embraces the work of all analytic therapies. While the roots of psychodynamic therapy lie predominantly in Freud's approach of psychoanalysis , Carl Jung, Alfred Adler, Otto Rank and Melanie Klein are all widely recognised for their involvement in further developing the concept and application of psychodynamics.

## Online Library The Psychodynamic Counselling Primer Counselling Primer

There are many different types of counselling, each based on their own concepts and orientations. Psychodynamic counselling offers a model for understanding the human personality and how it develops, our network of relationships and how we interact with others, how psychological problems may originate and the repetitive patterns that maintain them, and how personal change takes place.
